The invention relates to control of gibberellin (GA) levels in plants. The invention relates to control of gibberellin (GA) levels in plants. The method involves producing transgenic plants having a phenotype of reduced seed germination and reduced early seedling growth, then restoring seed germination and early seedling growth by treating plants with an appropriate compound when conditions are favourable. The method is useful to control seed germination and/or early seedling growth in agricultural production so that unfavorable environmental conditions normally reducing agronomic output can be avoided and yields increased. Plants also demonstrate increased uniformity of germination, emergence and seedling vigor, so increased uniformity of germination, emergence and seedling vigor, so increasing yields at harvest. The method is especially useful in crop plants such as e.g. canola, soybean, cotton, ctc., and is also useful in storage and transport of seeds to reduce premaination which may affect agronomic or food quality of the seeds. The present sequence is soybean GA 2-oxidase 2 cDNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  'n.

gibberellin (GA) 2-oxidase, PECAROXXX. This enzyme is a GA 2-beta-
bydroxylase that acts on C19-GAs and for which 2-beta-hydroxylation is
its only activity. Hydroxylation at the 2-beta position of a GA results
in a biologically inactive product, and is the most important route for
GA metabolism in plants, ensuring that the active hormones do not
accumulate in plant sensuring that the active hormones do not
accumulate in plant sensuring that the active hormones do not
accumulate in plant sensuring that the active hormones do not
cor otherwise enhanced to reduce the concentration of bioactive GAs in the
plants so that gibberellin 2-oxidase can be constitutively over-expressed
or otherwise enhanced to reduce the concentration of bioactive GAs in the
cor otherwise enhanced to inhibit plant growth. Growth inhibition is useful
in many agricultural and horticultural applications such as enhancing
lodging-resistance and grain yield in cereals, improving seedling
callity, reducing the growth of amenity grasses, reducing shoot growth in
corchard and ornamental trees, improving tolerance to cold, drought and
infection, and increasing yields (by the diversion of assimilates from
induce male and/or female sterility (by expression in floral organs),
prevent pre-harvest sprouting, reduce shoot growth in hedging plants,
inhibit reversibility in the development or germination of seeds and
inhibit reversibility and the development or germination of seeds and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 reduce shoot growth in commercial wood species. Antisense constructs of the nucleic acids can also be used to transform plants to reduce the expression of GA 2-oxidase (claimed) to promote plant growth, (e.g., to improve fruit set and growth in seedless grapes, citrus fruits and pears), improve skin texture and fruit shape in apples, increase stem length and therefore yield in sugar cane, increase sitem celery and rhubarb, improve malting yields and quality in cereals (particularly barley), and increase growth in woody species
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             79 ATTCCTGTGGTCGACCTCACGCACCCCGATGCCAAGAATCTCATAGTGAACGCCTGTAGG 138

The invention relates to an isolated polymucleotide comprising a nucleotide sequence encoding a polypeptide having GTP cyclohydrolase CC In(1/3,4-dihydroxy-2-butanone-4-phosphate synthase activity, appearing as ADM94266. Also included are a vector comprising the polymucleotide, a callast one regulatory sequence, transforming a cell with the ccomprising transforming a cell with the producing a plant (comprising transforming a plant cell with the polymucleotide and regenerating a plant from the transformed plant cell), caplant comprising the recombinant DNA construct. Also disclosed as new are nucleic acid conversed and segementating a plant cell with the a plant comprising the recombinant DNA construct and a seed comprising the recombinant DNA construct and a seed comprising the recombinant DNA construct and a seed comprising conversed to a plant comprising the recombinant DNA construct and a seed comprising the recombinant DNA construct and a seed comprising the recombinant DNA construct and a seed comprising conversed to a plant complyate assembled contigs encoding plant metabolism proceins chosen from GTP cyclohydrolase II/3,4-dihydroxy-2-butanone-4-phosphate synthase, bloxygenase, Ent-Kaurene Synthase A, GA-20 oxidase, Gibberellin chost proportein I, P-glycoprotein 3, P-glycoprotein ATPGP, P-glycoprotein I, P-glycoprotein By P-glycoprotein ATPGP, P-glycoprotein I, P-glycoprotein I, P-glycoprotein ATPGP, P-glycoprotein I, P-glycoprotein ATPGP, P-glycoprotein I, 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        polymorphism (RFLP). It can also be used to probe Southern blots containing restriction endonuclesse-treated genomic DNAs of a set of individuals representing parent and progeny of a defined genetic cross. The nucleic acid fragments may also be used as hybridisation probes against PCR amplification products generated from the mutation population using the mutation ag sequence primer in conjunction with an arbitrary genomic site primer. The peptides can also be used to immunise animals to produce polyclonal or monoclonal antibodies with specificity for peptides for detecting the polypeptides in situ in cells or in vitro in cell extracts. The present sequence encodes a plant metabolism protein (or
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            247
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            121                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      361 cor otherwise enhanced to reduce the concentration of bloactive GAs in the plants and therefore to inhibit plant growth. Growth inhibition is useful con many agricultural and horticultural applications such as enhancing lodging-resistance and grain yield in cereals, improving seedling capality, reducing the growth of amenity grasses, reducing shoot growth in orchard and ornamental trees, improving tolerance to cold, drought and infection, and increasing yields (by the diversion of assimilates from vegetative to reproductive organs). The nucleic acids may also be used to induce male and/or female sterility (by expression in floral organs), creduce male and/or female sterility (by expression in floral organs), inhibit reversibility in the development or germination of seeds and reduce shoot growth in commercial wood species. Antisense constructs of the nucleic acids can also be used to transform plants to reduce the expression of GA 2-oxidase (claimed) to promote plant growth, (e.g., to improve fruit set and growth in seedless grapes, citrus fruits and spars), improve skin texture and fruit shape in apples, increase stem length and therefore yield in sugar cane, increase yield and earliness in celery and rhubarb, improve malting yields and quality in cereals (particularly barley), and increase growth in woody species
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                198 TAGTCTCTGTTTTAGAACACGAGACCGTCGATTTCTTCTTCGTTGCCCAAGTCAGAGAAAA 257

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  This sequence represents cDNA encoding an Arabidopsis thaliana gibberellin (GA) 2-oxidase, PcGA2ox1. This enzyme is a GA 2-beta-hydroxylation is throxylase that acts on C19-GAs and for which 2-beta-hydroxylation is its only activity. Hydroxylation at the 2-beta position of a GA results in a biologically inactive product, and is the most important route for GA metabolism in plants, ensuring that the active hormones do not accumulate in plant tissues. The nucleic acids can be used to transform plants so that gibberellin 2-oxidase can be constitutively over-expressed
                                                                                                                                                                   815

//done libergweator: pSPORT1; Site_1: Sal1; Site_2: NotI; This colne liberay was constructed from mRNA isolated from seed coats (100-200mgs) of greenhouse grown plants. The library was prepared using the Life Technologies

library was prepared using the Life Technologies

SimperScript CDNA library construction kit. Complimentary DNA was synthesized from mRNA using a poly (dT) sequence with a Not I restrictions site. Sal I linkers adapers were ligated to the blunt-ended cDNA fragments followed by Not I digestion. The CDNA fragments were directionally cloned into the Not I -Sal I restriction site of the pSPORTI vector. The ligated cDNA fragments were transformed into E.coli Electromax DH10B host cells. This library was constructed by Dr. Lila Vodkin and Dr. Anu Khanna."

The 2 week old seedlings were salt stressed in a solution of 500mM Nacl for 3 days prior to harvesting. Complementary DNA was synthesized from mRNA using a primer consisting of a poly(dT) sequence with a XNoI restriction site. EcoRI adapters were ligated to the blunt-ended cDNA fragments followed by XNoI diggestion. The cDNA fragments were in the construction of the site of the plant fragments were in the construction of the site of the blunt fragments were in the construction of the site of the blunt fragments were in the construction of the site of the blunt fragments were in the construction of the site of the blunt fragments were in the construction of the site of the blunt fragments were in the construction of the site of the blunt fragments were of the site of the blunt fragments were in the construction of the site of the si

Life Technologies (a division of Invitrogen) members carried out full-length librairies construction: Temple G.

Genoscope members carried out sequencing and annotation: Castelli V., Aury J.M., Jaillon O., Wincker P., Menard M., Cruaud C., Schachter V., Weissenbach J., Salanoubat M. Montation is based on the June 2003 version of the Arabidopsis genome released by MIPS (Munich Information center for Protein Sequences): 5 prime and 3 prime are assembled with Phrap.

The sequences are based on single pass reads.

Life Technologies (a division of Invitrogen) members carried out full-length librairies construction : Temple G. Genoscope members carried out sequencing and annotation : Castelli V., Aury J.M., Jaillon O., Wincker P., Menard M., Cruaud C., Schachter V., Weissenbach J., Salanoubat M.

UKGV INRA : Clepet C., Caboche M.

Annotation is based on the June 2003 version of the Arabidopsis genome released by MIPS (Munich Information center for Protein Sequences). 5 prime and 3 prime are assembled with Phrap.

- Web : www.genoscope.cns.fr)
The sequences are based on single pass reads.
Life Technologies (a division of Invitrogen) members carried out
full-length librairies construction : Temple G.
Genoscope members carried out sequencing and annotation : Castelli
V., Aury J.M., Jaillon O., Wincker P., Menard M., Cruaud C.,
Schachter V., Weissenbach J., Salanoubat M.
URGV INRA : Clepet C., Caboche M.
Annotation is based on the June 2003 version of the Arabidopsis
genome released by MIPS (Munich Information center for Protein
Sequences) . 5 prime and 3 prime are assembled with Phrap.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ä

set of 9,216 low redundancy clones selected from CDNA libraries from various fissues and steages of development of soybean that consists of 2,706 CDNAs from germinating cotyledons (source libraries Gm-c1027); 1,355 CDNAs from immature seed coats (libraries Gm-c1019 and Gm-c1023); 917 CDNAs from tissue culture derived somatic embryos (source libraries Gm-c1019 and Gm-c1053); 917 CDNAs from tissue culture derived somatic embryos (source libraries Gm-c1067, and Gm-c1067, and Gm-c1067, and Gm-c1067, and Gm-c1068); and 963 CDNAs from young leaves exposed to bacterial and fungal pathogens (source libraries Gm-c1072, dm-c1073, and Gm-c1074). The 5' ESTS of the source clones from the different libraries was used to select singletons, or a representative of each contig, which were reracked to form library Gm-c1089 and the CDNA clones of the reracked Gm-r1088 library were then sequencing was funded by NSF Plant Genome project #8872565 (http://soybeangenomics.cropsci.uiuc.edu/) as part of creation of a low redundancy soybean CDNA select shingled by the laboratories of Lila vodkin, University of Illinois, Randy Shoemaker, lowa State University, and Paul Keim, Northern Arizona University, as part of the Public EST project, thtp://lso.186.26.94/soybeanset.html. The contig analysis to select unique genes was performed by the laboratories and Bioinformatics, University of Minnesoca, http://web.ahc.umn.edu/biodata/nsfsoy/. Reracking and 3' sequencing were conducted by services of the University of Ernest Retzel, Center for Computational Genomics http://web.ahc.umn.edu/biodata/nsfsoy/. Reracking and sequencing were conducted by services of the University of Illinois Keck Center for Computational Genomics http://web.ahc.umn.edu/biodata/nsfsoy/. Reracking and sequencing were conducted by services of the University of Illinois Seck Center for Computational Genomics http://web.ahc.um.edu/biodata/nsfsoy/. Reracking and 3' sequencing were conducted by Services of the University of the original cond information on the source library fo

L. Submitted (18-NOV-2003) Genoscope - Centre National de Sequencage :

By 191 91006 EVRY cedex - FRANCE (E-mail : seqref@genoscope.cns.fr
- Web : www.genoscope.cns.fr)

The sequences are based on single pass reads.

Life Technologies (a division of Invitrogen) members carried out full-length librairies construction : Temple G.

Genoscope members carried out sequencing and annotation : Castelli V., Aury J.M., Jaillon O., Wincker P., Menard M., Cruaud C., Schachter V., Weissenbach J., Salanoubat M.

NRAY INRA : Clepet C., Caboche M.

Annotation is based on the June 2003 version of the Arabidopsis genome released by MIPS (Munich Information center for Protein Sequences) : 5 prime and 3 prime are assembled with Phrap.
                                                                                                                                                                                                                                                                              CNSOABKL 1363 bp mRNA linear HTC 06-FEB-2004 Arabidopsis thaliana Full-length cDNA Complete sequence from clone GSLTPGH20ZC07 of Hormone Treated Callus of strain col-0 of Arabidopsis thaliana (thale cress).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Castelli, V., Aury, J.M., Jaillon, O., Wincker, P., Clepet, C., Menard, M., Cruaud, C., Quetier, F., Scarpelli, C., Schachter, V., Temple, G., Caboche, M., Weissenbach, J. and Salanoubat, M. Whole Genome Sequence Comparisons and 'Full-Length' cDNA Sequences: A Combined Approach to Evaluate and Improve Arabidopsis Genome

Submitted (18-NOV-2003) Genoscope - Centre National de Sequencage :
BP 191 91006 ENYE cedex - FRANCE (B-mail : seqref@genoscope.cns.fr
- Web : www.genoscope.cns.fr)
The sequences are based on single pass reads.
Life Technologies (a division of Invitrogen) members carried out full-length librarises construction : Temple G.
Genoscope members carried out sequencing and annotation : Castelli V., Aury J.M., Jaillon O., Wincker P., Menard M., Cruaud C., Schachter V., Weissenbach J., Salanoubat M.
URGV INRA : Clepet C., Caboche M.
Annotation is based on the June 2003 version of the Arabidopsis genome released by MIPS (Munich Information center for Protein Sequences). Sprime and 3 prime are assembled with Phrap.
Castelli, V., Aury, J.M., Jaillon, O., Wincker, P., Clepet, C., Menard, M., Cruaud, C., Quetier, F., Scarpelli, C., Schachter, V., Template, G., Caboche, M., Weiseenbach, J. and Salanoubat, M. Whole Genome Sequence Comparisons and 'Full-Length' cDNA Sequences: A Combined Approach to Evaluate and Improve Arabidopsis Genome
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            http://www.genoscope.cns.fr/externe/sequences/Banque_Projet_EF/Full

/note="Vector: Bluescript II SK+; Site I: EcoRI; Site_2:
Xho1; The cDNA library was constructed from floral
meristenatic mRNA provided by Dr. Halina Knap of Clemson
University. Complementary DNA was synthesized from mRNA
using a primer consisting of a poly(dT) sequence with a
XhoI restriction site. EcoRI adapters were ligated to the
blunt-ended cDNA fragments followed by XhoI digestion. The
CDNA fragments were directionally cloned into the
ECORI-XhoI restriction site of the pBluescript vector. The
ligated cDNA fragments were transformed into DH10B host
cells (GibcoBRL). This library was constructed in the
laboratory of Dr. Randy Shoemaker."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       AJ803092 Antirrhinum majus whole plant Antirrhinum majus cDNA clone 018 5 05 018, mRNA sequence.

Direct Submission

Submitted (18-NOV-2003) Genoscope - Centre National de Sequencage :

BP 191 91006 EVRY cedex - FRANCE (E-mail : seqref@genoscope.cns.fr

- Web : www.genoscope.cns.fr)

The sequences are based on single pass reads

Life Technologies (advision of Invitrogen) members carried out full-length librairies construction : Temple G.

Genoscope members carried out sequencing and annotation : Castelli V., Aury J.M., Jaillon O., Waincker P., Menard M., Cruaud C., URCY INRA : Clept C., Caboche M.

URCY INRA : Clept C., Caboche M.

Annotation is based on the June 2003 version of the Arabidopsis genome released by MIPS (Munich Information center for Protein Sequences). S prime and 3 prime are assembled with Phrap.
                                                                                                                                                                                           Arabidopsis thaliana (thale cress)

Complementary DNA was synthesized from mRNA using a primer consisting of a poly(dT) sequence with a XhoI restriction site. EcoRI adapters were ligated to the blunt-ended cDNA fragments followed by XhoI digestion. The CDNA fragments were directionally cloned into the EcoRI-XhoI restriction site of the pBluescript vector. The ligated cDNA fragments were transformed into DHIOB host cells (GibcoBRI). This library was constructed in the laboratory of Dr. Randy

/dionellberlate Blight-Challenged Tubers"
//dionellberlate Blusscript II SK(+) KR; Site 1: ECORI;
Site 2: KhoI; supplier: Pathogen-challenge series. Tubers
Site 2: KhoI; supplier: Pathogen-challenge series. Tubers
from pathogen-free Solanum tuberosum var. Shepody, clone
1756, were inoculated with 5 ul of Phytophthora infestans
(A2-mating type), through 2 puncture wounds 3 cm apart.
The tubers were inocubated 1 minute to allow inoculum
absorption. The infection area was outlined for future
collection reference. Surface slices were sampled from the
tubers at 1 day, 5 days, 7 days, 11 days and 14 days
post-infection. All samples were pooled and used for RNA
isolation and library construction. A normalized library
was constructed following a modified protocol of Bonaldo
et al. (1996. Genome Research 6: 791-806)."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              363 GATCCACAAATTATTTCTTTATTAAGATCCAATAACACTTCTGGACTTCAAATTTACACTT 422

Flinn, B., Rothwell, C., Sardana, R., Griffiths, R., Lague, M., De Koeyer, D., Audy, P., Goyer, C., Li, X.-Q., Wang-Pruski, G. and Regan, S. Gneration of ESTs from late blight-challenged potato tubers
                                                                                                                                                                                                                                                                                 ŏţ
                         RNA was extracted from whole root systems. CDNA was prepared from polyA+ enriched RNA. The CDNA was directionally ligated into Uni-zap RR vector from Stratagene and packaged using Gigapack Gold packaging extracts. Plasmids containing cDNA inserts were mass-excised from phage stocks using Exhssit helper phage and propagated in SOLR cells. Clone ordering and sequencing was performed by the Centre National de Sequencage (Genoscope, Evry, France). Note: EST may be of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      900
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    242
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            840
